

TJM CANOPY

100KG
LOAD CAPACITY

**"SUPPLIED STANDARD
IN MAZDA COOL WHITE"**

TJM CANOPY - MAZDA BT50

Developed to precisely fit the curves and shape of the Mazda BT50. The design for the BT50 canopy matches the vehicle shape perfectly, and includes a wide access rear door to make loading easy. All Mazda BT50 TJM canopies are load rated to 100kg and also include the following features:

Strength is the foundation

Heavy duty 5mm fibreglass construction.

Solid Integrated Base-rail

Central to every canopy is the unique fully integrated base rail assembly. This provides a water tight, extremely strong mounting architecture for enduring performance.

Window Options

Adaptable window options include: no windows (fibreglass sides), fixed, sliding or lift-up side windows options.

High quality components, and tempered safety glass is used for all windows & doors.

We've Set the Standard - AS 1235; 2000

In accordance with the loading requirements of the Australian standard. The following canopies have successfully achieved a rated load capacity of 100kg.

Robust Roof Rack Mounts

A dual layer of 4.5mm fibre reinforced composite greatly increases the thickness and strength.

Smooth Exterior

A smooth, high gloss, durable finish in gel coat white, coupled with optimum UV protection ensures a maintenance free exterior.

**BUILT STRONG
BUILT TO LAST**
