

# Ford PX Ranger®/Mazda BT50®

## 145 Litres\* Long Range Polymer Fuel Tank

All tanks are made from a scientifically designed blend of polymer materials to make an extreme grade of High Density Polyethylene (HDPE). This polymer blend has been designed for fuel storage. Blending itself to automotive and military applications, it has a high resistance to chemicals, temperature and impact.

- Lightweight polymer compared to steel tanks:  
Polymer tank 19kgs approx.  
Steel tank 45kgs approx.
- No rusting or corrosion issues like steel tanks.
- Greater impact resistance than steel.
- Polymer tanks are made from a 1 piece construction, no welds that can crack or leak from like steel tanks.
- Polymer tanks are easier to install.
- Polymer tanks use the original mounting points so no drilling or modification of the chassis is required.
- Polymer tanks come complete with mounting kit.
